NOTES

STANDARD NOTES

To prevent condensation, a minimum 2" from the walk-in exterior surface is required. High humidity conditions may require force ventilation in addition to clearance. Installation site floor must be true and level within 3/16" per 10' or additional costs may be incurred.

Imperial Brown's sliding and vertical lift doors shall not be considered means of egress. Check code egress requirements for your application.

ELECTRICAL

Field electrician to verify maximum acceptable load for light switches. If load is too high, then relay type controls should be used. Other wiring devices, ALU conduits must be sealed to stop moisture transfer through electrical penetrations. All electrical penetrations must be sealed to prevent moisture failure to seal device per NEC codes WILL VOID WARRANTY.
